

THE RED TSUNAMI ENDORSEMENTS

12.14.2025

“*The Red Tsunami* is a crucial survival guide for the world we’re living in right now. Casey lays out the evidence piece by piece, revealing the deliberate, whole-of-society assault being carried out against every American - and every citizen of the free world - by a technologically empowered adversary unlike anything we’ve faced before. This book connects the dots with clarity and precision, giving readers the framework they need to understand and push back against the forces shaping today’s geopolitical reality. Bold, unflinching, and deeply coherent, *The Red Tsunami* is more than a compelling read - it’s a call to vigilance and immediate action. For anyone who wants to understand what’s happening and what must be done, this book is essential.”

- Dr. Rob Spalding III | Brigadier General, United States Air Force (ret.) | Senior fellow, Hudson Institute | Senior Director of Strategic Planning, U.S. National Security Council | Military Fellow, Council of Foreign Relations | CEO of Sempire | author of *Stealth War: How China Took Over While America’s Elite Slept*, and *War Without Rules*
-

“Casey Fleming’s *The Red Tsunami* is a clear and unambiguous warning of the war about the Chinese Communist Party, and their ideological allies, are waging against American citizens and those who believe in the unalienable right to life, liberty and the pursuit of happiness that have transformed human history for the better. Casey comprehensively, and systematically, examines each face of the CCP’s agenda from flooding our shores with fentanyl to poisoning the minds of our youth with lies from a failed and murderous ideology.

The book is also a call to personal action from each American citizen who recognizes this threat, sitting on the sidelines is no longer an option. Read this book, share it with your family and the new generations coming up as time is running out. Americans can turn this around, if we recognize the threat and take immediate action, this book mightily contributes to that outcome.

- James E. Fanell | CAPT, United States Navy (ret.) | Career U.S. naval intelligence officer | Senior intelligence officer for China at the Office of Naval Intelligence | Chief of intelligence for CTF-70, Seventh Fleet, and the U.S. Pacific Fleet | Co-author of *Embracing Communist China: America's Greatest Strategic Failure*
-

“Casey captures the full context of China’s unrestricted war on America and the West, and puts into a riveting book - *The Red Tsunami*. A book that every American and member of the free world should read. Denial or refusal to believe the evidence laid out of China’s infiltration, subversion, espionage, indoctrination and murder of Americans only accelerates our demise. Sadly, our leaders silo these events, enabling China to outmaneuver us across multiple fronts. Yet, Casey offers each of us options to achieve victory in this war. Read, act, as time is not on our side.”

- Edward Haugland | Leading expert in Cognitive War | Retired intelligence community executive | Author of *The Cognitive War*
-

“As a documentary filmmaker, I’m struck by how *The Red Tsunami* pulls every American into the frame. This isn’t a distant geopolitical drama - it’s a story we’re all already in. The book gives Washington the strategic clarity it has long needed, and gives citizens the awareness they urgently deserve. Sharp, cinematic, and uncomfortably real.”

- Katherine Hu | Documentary Filmmaker | Executive Producer and Director of *The Final War*
-

“Casey Fleming has written a necessary book. It’s certainly not entertainment, but is engrossing and enthralling. It has the pace of a thriller but substantiated by deep research, hard facts and an impressive Thomistic ability for insightful synthesis. A tour de force.”

- Dr. Orlando Gutierrez Boronat | Secretary General, Assembly of the Cuban Resistance
-

“Casey provides a great service to the free world by writing this book, and I believe that should be required reading in every middle school, high school, and university so that people get a clear sense of the existential threat the West and the U.S. is facing. We're in a generational struggle not just for geopolitical supremacy but for the foundational principles of liberty and democracy. This book is a crucial tool in that fight.”

- Ken Cao | Executive Director, Center for Asian Democratic Resilience

“*The Red Tsunami*” is not just a book - it is a wake-up siren every American desperately needs to hear.

As someone who has spent years on the front lines of the fentanyl crisis - fighting the Chinese chemical networks and Mexican cartels that killed my son and over 100,000 Americans a year - I can tell you firsthand: the threat described in these pages is real, and it's already here.

It lays out what most people never connect: the fentanyl poisoning our children, the cyber theft crippling our businesses, the psychological warfare on our youth, the infiltration in our schools, universities, and government - none of it is random. It is part of a decades-long strategy designed by the CCP to weaken America from the inside out.

What T. Casey Fleming does brilliantly is explain the whole picture in a way every parent, teacher, policymaker, and citizen can understand. This is not fear-mongering. This is what those of us fighting fentanyl, border insecurity, and Chinese operations have been trying to warn America about for years.

The opening chapters read like a survival guide: clear, urgent, and grounded in real-world intelligence, not speculation.

If America is going to win this fight - for our children, our communities, and our future - then every single person needs to understand the enemy, the methods, and the stakes. This book gives you that understanding.

Every American should read this. Every parent should read this. And every elected official MUST read this. We are running out of time to stay asleep.

This book connects all the dots - and once you see it, you can't un-see it.

I endorse it fully.

- April Babcock | Founder and President, Lost Voices of Fentanyl

“*The Red Tsunami* is an essential and uncompromising exposé of the Chinese Communist Party's vast, multi-domain campaign to undermine and ultimately defeat the West. Fleming has produced one of the most comprehensive analyses to date of the CCP's strategy of Unrestricted Warfare - a strategy I have long argued has been underway for over two decades and is far more advanced than most Western leaders dare to admit.

What makes this work so important is its focus on the totality of the threat. Fleming demonstrates, with forensic precision, how the CCP is targeting every layer of Western society: our economies, our institutions, our information ecosystems, our faith traditions, our politics, and even the mental resilience of our populations. He exposes how economic coercion, intellectual property theft, fentanyl distribution, biological manipulation, political subversion, cultural division, and technological infiltration form a single, integrated war plan designed to collapse the West from within.

Crucially, *The Red Tsunami* lays bare the “perfect storm” now engulfing America and its allies - a convergence of dependency, division, corruption and institutional erosion that Beijing has not only exploited, but actively engineered. Fleming's revisiting of the *45 Goals of Communism* is both illuminating and deeply unsettling, revealing just how far these long-standing objectives have already penetrated Western life.

This book is not merely diagnostic; it is prescriptive. Fleming offers a Whole-of-Society survival guide - a blueprint for individuals, families, communities and nations to harden themselves against the CCP's influence. His central message is one I profoundly share: every citizen has a role in defending freedom, and collective complacency is fatal. Above all, Fleming situates this conflict within its proper moral and spiritual context. The CCP's war is not only political or economic - it is ideological and spiritual, an assault on human dignity and the fundamental values that underpin free civilization.

The Red Tsunami is a wake-up call of the highest order. It is a timely, courageous, and necessary contribution to the global effort to understand and counter the most pervasive geopolitical threat of our age. Every citizen who cares about the future of the West - and the survival of liberty itself - must read this book without delay."

- David Murrin | Global Forecaster | Author of *Breaking the Code of History*

BRIEF VERSION - MURRIN

"The Red Tsunami is an essential warning about the Chinese Communist Party's comprehensive campaign to undermine and ultimately defeat the West. Fleming exposes the full scope of the threat with clarity and precision, showing how economic pressure, political subversion, cultural manipulation, and technological infiltration form a unified strategy against civilians. Just as importantly, he offers a practical roadmap for how citizens and nations can strengthen themselves against this challenge. This book is timely, courageous, and deeply necessary - a must-read for everyone concerned about the future of the West and the defense of freedom."

- David Murrin | Global Forecaster | Author of *Breaking the Code of History*

The Red Tsunami is one of the most important and urgent books of our time, documenting the alarming national security threats affecting every American. Casey Fleming brilliantly exposes the full scope of China's unrestricted war on the United States, its infiltration, espionage, economic coercion, political subversion, and the deadly chemical and information campaigns that are murdering our kids and rapidly weakening our nation. After spending decades on the front lines of national security, and the last eight years supporting families across America devastated by fentanyl, I can tell you this threat is not theoretical. It's real, it's here, and it's impacting every community in this great country.

Fleming connects all the dots with clarity, precision, and courage, revealing how the CCP's multilayered strategy targets our institutions, our security, and even the hearts and minds of our children through social media and digital influence. He provides a roadmap that every citizen, including parents, educators, law enforcement professionals, policymakers, and community leaders, must understand if we're going to protect the next generation and preserve our way of life. The gravity of the threat is enormous, and we need a sense of urgency on all fronts to confront this escalating crisis.

This book is not optional. The Red Tsunami should be required reading for every American citizen who cares about the future of our country and the defense of freedom itself. Thank you, Casey, for this powerful work. I'm grateful God connected us. You have done spectacular and professional work, and your dedication to exposing this threat is invaluable.

- Derek Maltz | Former Director, DEA Special Operations Division | Former Acting DEA Administrator

The Red Tsunami is an essential read for anyone seeking clarity in this tenuous and turbulent moment in world affairs. With concise, highly digestible analysis, it exposes the accelerating and existential threat posed by the Chinese Communist Party (which acts in total disregard of the rights and wellbeing of the Chinese population). Casey's analysis is focused and demonstrates a lucidity that both informs and alarms in equal measure.

Drawing on his years of counterintelligence insight, the book connects the dots others overlook, revealing how the CCP's "unrestricted warfare" is already reshaping our economy, culture, security, and everyday lives. Fleming's work is not a political argument but a survival guide: clear, accessible, empirically grounded, and urgently necessary. We all need to understand the forces destabilizing the free world and what must be done to safeguard The *Red Tsunami* fulfills that need and is an indispensable asset for those seeking to protect their family, their communities, and their nation.

- Wayne Lonstein | Esq., CISSP | CEO of VFT Solutions | Member of Forbes Technology Council

"This book is a must-read! If you are confounded by the chaos and dysfunction unfolding across every domain of American life, this work provides the clarity you've been searching for. It powerfully exposes how the Chinese Communist Party (CCP) has infiltrated key sectors and strategically undermined America in an effort to diminish our standing as a global leader.

For far too long, hostile foreign actors have operated in the shadows. This book brings their nefarious activities into the light - clearly, boldly, and convincingly. Bravo!"

- Dr. Kevin McGary | Project 21 Ambassador | Co-founder, Every Black Life Matters (EBLM)

"If you're looking for one book that explains why China matters to you, you must read *The Red Tsunami*. Casey Fleming lays out in disturbing, conclusive detail the decades-long war the Chinese communists are waging against America and Americans. It's not a shooting war - yet, but the PRC has killed over half a million Americans with Fentanyl, destroyed our manufacturing base, and split our society. Fleming exposes what the Chinese are doing, and how. His section on how to protect ourselves and our minds is priceless advice. All Americans -- including everyone on Capitol Hill and in the White House -- must read this book."

- Grant Newsham | COL, United States Marine Corps, (ret.) | Former reserve head of intelligence for Marine Forces Pacific | Author of *When China Attacks: A Warning to America*

"*The Red Tsunami* is the most urgent and necessary guide for the times we're living in.

As someone who studies culture, politics, and ideology for a living, very few books stop me in my tracks - this one did. Casey Fleming has written a masterwork that finally connects the dots most Americans have sensed for years but couldn't quite articulate. From fentanyl poisoning to cultural rot, from cyber infiltration to psychological warfare, *The Red Tsunami* exposes how every one of these seemingly isolated crises is part of a coordinated global assault on freedom.

What makes this book so powerful is its clarity. Casey pulls back the curtain on the Chinese Communist Party's "unrestricted warfare" strategy and shows exactly how it touches our families, our schools, our economy, and even our faith. He explains why the world feels like it's unraveling - and he does it without hysteria, without partisanship, and without apology.

This is not fear mongering. It is fact-based, deeply sourced, and courageously honest. It's a wake-up call written by someone who has spent years on the front lines of counterintelligence, warning leaders around the world while the rest of society remained distracted. Casey has taken that same level of intelligence briefing and placed it directly into the hands of everyday citizens.

If you have children, if you value freedom, if you feel something is deeply wrong in our country, then this book is not optional - it's essential.

The Red Tsunami will challenge you, empower you, and equip you to understand the war that has already reached your doorstep. This is more than a book; it's a blueprint for courage in a time of global deception.

I cannot recommend it strongly enough.”

- April Chapman | Project 21 Ambassador | Host of Unshakable with April Chapman | Author | Speaker
-

“This book will shake the soul of every American who still believes freedom is worth fighting for.

Casey Fleming has done what few men in this country have the courage to do - he has pulled the curtain back on the real war being waged against America. *The Red Tsunami* is not fiction; it's not speculation - it's documentation. It's the evidence of a long, methodical plan by the Chinese Communist Party and its willing accomplices here at home to weaken the moral, spiritual, and economic backbone of this nation.

This book reads like a counterintelligence briefing for patriots. It connects the dots between Marxist infiltration, cultural manipulation, and political betrayal - and it does it with surgical precision. Casey exposes the truth that most politicians are too scared to say out loud: America isn't falling apart by accident; she's being attacked from within.

For decades, the enemies of God and freedom have used our schools, our media, and even our churches to enslave us through lies. *The Red Tsunami* names-names, follows the money, and calls this evil what it is - spiritual warfare disguised as social progress.

Every pastor, parent, and patriot should read this book. It's not just an education - it's a call to arms for the heart and mind. If you've ever wondered how America went from strength to submission, this book tells you exactly how it happened and how we can fight back.

Casey Fleming has written a masterpiece of truth. If you love your country, you need this book.”

- Vince Everett Ellison | Project 21 Ambassador | Author | Speaker | Host of The Vince Everett Ellison Show | Author of *25 Lies and The Iron Triangle*
-

The Red Tsunami by Casey Fleming is the most comprehensive explanation of the demonic asymmetrical threat to America posed by China. This book should be required reading of every elected official in America; every corporate executive and member of Boards of Directors; along with every teacher, professor, and every elementary, high school and college student in America and the free world.

This is a comprehensive collection of well researched data on the methods and actions of the Chinese Communist Party to undermine America in their goal of total global domination. While chilling, the book is a wakeup call for all of us. His chapter on steps that every citizen needs to take to protect themselves, their families and our country is compelling and a call to action that everyone of us must heed.

Thank you, Casey for funding the research necessary to compile this unvarnished exposé on the Chinese Communist Party's extensive program to destroy America and our American way of life.

- Lynn Mattice | President, National Economic Security Alliance
-

“*The Red Tsunami* is a vital call to action of every citizen for a nation under siege. Freedom endures only when patriots confront danger with clarity and courage, and Casey Fleming provides both in these pages. As someone who is a survivor of communism, who has spent decades warning America about China's strategic onslaught, and who has now lost his only son to the CCP's drug warfare through fentanyl, I can attest that this threat is not abstract. It is real, it is lethal, and it is already here. Fleming exposes the hidden mechanisms of Beijing's campaign against our sovereignty, our children,

and our Republic. Every American who loves this country must read this extraordinary book, understand the battlefield, and stand firm. Our future depends on the courage we summon today.”

- Dr. Rafael Marrero | Founder and Chief Economist, Miami Strategic Intelligence Institute

Casey Fleming has written a major strategic study and what is surely the definitive game plan to stop Chinese aggression on the American people. Casey is the consummate patriot and a master strategist with a deep understanding of the Chinese Communist Party (CCP). *Red Tsunami* is a sharp-focused survival guide for this nation as it battles the CCP.”

“Casey Fleming’s *The Red Tsunami* is an original, persuasive, and important contribution to our understanding of the Chinese Communist Party (CCP) aggression in America.”

“Readers interested in America’s fight against the Chinese Communist Party (CCP) aggression should consider Casey Fleming’s *The Red Tsunami*, which is tightly written and carefully researched. It immediately engages the reader and never lets go.”

“Casey Fleming is the most astute expert of the Chinese Communist Party (CCP) working in any language today.”

“Casey Fleming’s *The Red Tsunami* is irresistibly readable and one of the very few books about the dangers of the Chinese Communist Party (CCP) to the American homeland. The author conveys the reality of the CCP menace so directly, vividly, accurately, and clearly.”

– Dr. Corvin Connolly | Cyber Editor

I have reviewed the book of *The Red Tsunami - The Silent Storm Killing Your Freedom* with careful attention, both as a microbiologist trained in biodefense and outbreak response and as someone who has spent decades studying how authoritarian systems weaponize science, public health, and information.

This book is not speculative fiction, nor is it abstract geopolitical theory. It is a sober, comprehensive warning - one that aligns closely with what many of us in national security, intelligence, and biodefense communities have observed quietly and often unsuccessfully tried to communicate for years.

During my service as a U.S. Army microbiologist, I was directly involved in responses to major infectious disease threats, including MERS and Ebola. At the end of 2019, I was among the first U.S. microbiologists to publicly question the Chinese Communist Party’s handling of the COVID-19 outbreak, to identify early warning signs of suppression and data manipulation, and to raise concerns about the virus’s true origins. Those concerns were not political; they were scientific, intelligence-driven, and rooted in pattern recognition from prior biological events.

Since then, I have published extensively on the CCP’s military-civil fusion strategy specific to virology and life-science research, as a co-founder of CCP Biothreats Initiative.

What *The Red Tsunami* accomplishes is the integration of these same patterns into a unified framework that the general public can understand. The author correctly situates biological threats, narcotics warfare, cyber operations, cultural subversion, and cognitive manipulation within the doctrine of “Unrestricted Warfare.” This is precisely how modern state-level adversaries operate: not through isolated attacks, but through cumulative, deniable, and multi-domain pressure designed to erode societal resilience long before conventional conflict ever begins.

This book is particularly effective in demonstrating how abstract strategies translate into real human cost - lost lives, destroyed families, compromised institutions, and a gradual normalization of chaos. From a scientific and security standpoint, this is accurate. Biological and chemical threats do not need to be spectacular to be effective; they only need to be persistent, plausibly deniable, and poorly understood by the public. The same is true of information warfare and psychological operations.

The Red Tsunami should be read not as a call to panic, but as a call to literacy: strategic, civic, and moral literacy. Its value lies in connecting dots that are too often examined in isolation by siloed institutions. In doing so, it provides a clearer picture of the environment we are already operating in.

For citizens, policymakers, educators, business leaders, and scientists who wish to understand the nature of twenty-first-century conflict - and the role that biology, technology, and information play within it - this book is a timely and necessary contribution.

History shows that free societies rarely collapse from a single blow. They collapse when warnings are ignored, when threats are compartmentalized, and when truth becomes too inconvenient to confront. *The Red Tsunami* refuses that convenience.

Xiaoxu Sean Lin, Ph.D. | Executive Director, Consilium Institute | Co-founder, CCP Biothreats Initiative | Associate Professor, Fei Tian College, Middletown, New York

EXAMPLES

“Casey Fleming delivers the clearest and most urgent wake-up call Americans have received about the Chinese Communist Party’s operations inside our country. *The Red Tsunami* exposes the CCP’s strategy with unmistakable precision and lays out a battle plan each citizen must act on immediately. Fleming writes with the authority of a master strategist and the urgency of an expert who knows time is running out. This is not just a book - it is an alarm for every American who understands the CCP threat is no longer approaching. It is here.”

“Casey Fleming has produced the brilliant, hard-hitting strategic playbook every American and all world citizens needs *right now* to confront CCP aggression on our own soil. His analysis is uncompromising, his warnings undeniable, and his guidance essential.”

“*The Red Tsunami* is a critical and un-ignorable contribution to understanding the communist CCP’s accelerating attack against the United States and free world - clear, urgent, and impossible to dismiss.”

“Relentlessly researched and written with laser intensity, *The Red Tsunami* grips the reader immediately and never releases its hold. Anyone serious about saving freedom the CCP threat must read this before the window to act closes.”

“Casey Fleming stands at the very forefront of global CCP analysts - precise, unflinching, and years ahead of the curve.”

“*The Red Tsunami* is urgent, vivid, and brutally clear about the real existential danger the CCP poses to America. Fleming reveals the threat with a level of clarity and immediacy few authors have achieved.”

“Book of the decade...brilliant!”
